

Miami Dade County Residential Single Stream Program

59,163 Mature Trees

This represents enough saved timber resources to produce more than 640.2 Million sheets of newspaper!

17 million Kw-Hrs of Electricity from Recycling

This is enough power to fulfill the monthly electricity needs of more than 1,637 homes!

32,153 Cubic Yards Of Landfill Airspace

This represents enough airspace to fulfill the municipal waste disposal needs for 41,292 people for one month!

In the months of April, May, and June,

Miami Dade County recycled:

3,519 tons of cardboard/paper;

2,019 tons of mixed paper;

210 tons of tin cans;

1,065 tons of plastics;

154 tons of aluminum;

And 1,458 tons of glass.

Recycling these materials avoided their manufacturing from virgin materials thereby conserving these natural resources.

Avoided 7,837 Metric Tons (MTCO₂E) of GHG Emissions

The recycling of these materials prevented these GHG emissions!

38.7 Million Gallons of Water

This represents enough fresh water to meet the daily fresh water needs of more than 516,979 people!

1 The environmental benefits shown here represent the difference in natural resource consumption and GHG emissions that result from using recycled inputs versus virgin inputs. MTCO₂E = metric tons of Carbon dioxide equivalent.
