Injection Wells Drilling services

SOLICITATION NO.: RTQ-00566  
Injection Wells Prequalification Pool  
Aug 18, 2017

MIAMI-DADE COUNTY, FLORIDA

R E Q U E S T T O Q U A L I F Y

TITLE:

Injection Wells Prequalification Pool

FOR INFORMATION CONTACT:

Natalya Vasilyeva 305-375-4725 [Natalya.Vasilyeva@miamidade.gov](mailto:Natalya.Vasilyeva@miamidade.gov)

IMPORTANT NOTICE TO BIDDERS/PROPOSERS:

- READ THE ENTIRE SOLICITATION DOCUMENT, THE GENERAL TERMS AND CONDITIONS, AND HANDLE ALL QUESTIONS IN ACCORDANCE WITH THE TERMS OUTLINED IN PARAGRAPH 1.2(D) OF THE GENERAL TERMS AND CONDITIONS.
- THE SOLICITATION SUBMITTAL FORM CONTAINS IMPORTANT INFORMATION THAT REQUIRES REVIEW AND COMPLETION BY ANY BIDDER/PROPOSER RESPONDING TO THIS SOLICITATION.
- FAILURE TO COMPLETE AND SIGN THE SOLICITATION SUBMITTAL FORM WILL RENDER YOUR PROPOSAL NON-RESPONSIVE.

**GENERAL TERMS AND CONDITIONS:**

All general terms and conditions of Miami-Dade County Procurement Contracts are posted online. Bidders/Proposers that receive an award from Miami-Dade County through Miami-Dade County's competitive procurement process must anticipate the inclusion of these requirements in the resultant Contract. These general terms and conditions are considered non-negotiable.

All applicable terms and conditions pertaining to this solicitation and resultant contract may be viewed online at the Miami-Dade County Procurement Management website by clicking on the below link:

<http://www.miamidade.gov/procurement/library/boilerplate/general-terms-and-conditions-r16-3.pdf>

---

**NOTICE TO ALL BIDDERS/PROPOSERS:**

Electronic bids are to be submitted through a secure mailbox at BidSync ([www.bidsync.com](http://www.bidsync.com)) until the date and time as indicated in this Solicitation document. It is the sole responsibility of the Bidder/Proposer to ensure their proposal reaches BidSync before the Solicitation closing date and time. There is no cost to the Bidder/Proposer to submit a proposal in response to a Miami-Dade County solicitation via BidSync. Electronic proposal submissions may require the uploading of electronic attachments. The submission of attachments containing embedded documents or proprietary file extensions is prohibited. All documents should be attached as separate files.

For information concerning technical specifications please utilize the question/answer feature provided by BidSync at [www.bidsync.com](http://www.bidsync.com) within the solicitation. Questions of a material nature must be received prior to the cut-off date specified in the solicitation. Material changes, if any, to the solicitation terms, scope of services, or bidding procedures will only be transmitted by written addendum. (See addendum section of BidSync site).

Please allow sufficient time to complete the online forms and upload of all proposal documents. Bidders/Proposers should not wait until the last minute to submit a proposal. The deadline for submitting information and documents will end at the closing time indicated in the solicitation. All information and documents must be fully entered, uploaded, acknowledged (Confirm) and recorded into BidSync before the closing time or the system will stop the process and the response will be considered late and will not be accepted.

**PLEASE NOTE THE FOLLOWING:**

No part of your proposal can be submitted via **HARDCOPY, EMAIL, OR FAX**. No variation in price or conditions shall be permitted based upon a claim of ignorance. Submission of a proposal will be considered evidence that the Bidder/Proposer has familiarized themselves with the nature and extent of the work, and the equipment, materials, and labor required. The entire proposal response must be submitted in accordance

with all specifications contained in the solicitation electronically.

---

**SECTION 2 – SPECIAL TERMS AND CONDITIONS****2.1. PROJECT OVERVIEW****A. Introduction**

Miami-Dade County, hereinafter referred to as the County, as represented by Miami-Dade County Water and Sewer Department (WASD), is soliciting qualified firms to submit their qualifications for consideration into a Prequalification Pool, hereinafter referred to as the "Pool", for the purpose of providing Deep Injection Wells Drilling and Construction Services for WASD.

**B. Purpose**

This Request to Qualify (RTQ) will establish a pool of pre-qualified vendors capable of providing Deep Injection Wells Drilling Services for the Miami-Dade County (MDC). Entry into the pre-qualification pool is not a contract between MDC and any member of the pool, but rather is an acknowledgement that the pool member satisfies the pre-qualification criteria set forth below for membership in the pool. Pre-qualified vendors will be invited to participate in future spot market competitions. The pool shall remain open for the term of the RTQ, enabling vendors to qualify at any time after the initial RTQ opening date.

**C. Term**

The pre-qualification pool will begin on the first calendar day of the month succeeding approval by the Board of County Commissioners, or designee, unless otherwise stipulated in the Notice of Award Letter which is distributed by the County's Internal Services Department, Procurement Management Services Division, and contingent upon the completion and submittal of all required Request for Quotes (RFQ) documents. The pre-qualification pool shall expire on the last day of the last month of the five (5) year period.

**D. Option To Renew**

Prior to, or upon completion, of that initial five (5) year term, the County shall have the option to renew this contract for an additional five (5) year(s) period. Continuation of the contract beyond the initial period, and any option subsequently exercised, is a County prerogative, and not a right of the vendor. This prerogative may be exercised only when such continuation is clearly in the best interest of the County.

Should the vendor decline the County's right to exercise the option period, the County may consider the vendor in default which decision may affect that vendor's eligibility for future contracts.

**E. Qualification Criteria**

Submitters must submit all of the qualifying documents, all of the specified information and attachments listed below with their submittal form as proof of compliance to the requirements of this RTQ. However, the County may, at its sole discretion and in its best interests, allow Submitters to complete, supplement or supply the required documents in order to satisfy the prequalification criteria. It shall be the sole prerogative of the County to determine the number of Submitter(s) who will be included under this RTQ. During the term of the RTQ, the County reserves the right to add and/or delete Submitters as it deems necessary. The pre-qualified Submitter(s) must maintain the qualifications of the Submitter, as required herein, and offered key personnel submitted in response to this Solicitation, throughout the life of the Pool. Membership in the Pool is a prerequisite for having an opportunity to obtain work through this Pool. Selection into the Pool does not guarantee work and does not provide for exclusive rights to these services for the County.

Submitters must meet the following qualifications:

1. *Minimum Qualification Requirements*

Submitter(s) shall hold the following licenses and will be required to provide copies of all licenses with their response to this solicitation:

- State of Florida Certified General Contractor's license.
- State of Florida Water Well Contractor's license as required by the Florida Department of Environmental Protection Underground Injection Control regulations.

Submitters must provide documentation to demonstrate competency and experience as outlined in the following general qualification requirements.

2. *General Qualification Requirements*

At the time of RTQ Submittal, Submitters must meet following experience, qualifications requirements and where applicable provide proof of equipment ownership:

- a) Successful completion of 3 large diameter (minimum casing diameter 24-inches or greater, to a depth of at least 2,500 feet) Underground Injection Control (UIC) Class I Deep Injection Wells in Florida within the past 10 years.
- b) Capability to construct a 54-inch borehole to 1,500 feet below land surface:
  - ownership of drilling fluid circulation systems with the capacities, pumps, and tanks, capable of constructing a 54-inch borehole to 1,500 feet below land surface.
  - expertise and experience in managing equipment listed above.
- c) Capability to construct a 24-inch injection well to 3,000 feet below land surface.
  - ownership of cementing equipment, mixing capacity, pumping capacity, pressure capacity and dry cement storage volume capable of constructing a 24-inch injection well to 3,000 feet below land surface.
  - expertise and experience in managing equipment listed above.
- d) Experience and expertise in providing log-derived TDS plots to support identification of the base of underground sources of drinking water.
- e) Capability to reverse air drill a 34-inch borehole to 3,400 feet
  - ownership of the equipment necessary to reverse air drill a 34-inch borehole to 3,400 feet.
  - expertise and experience in managing equipment listed above
- f) Capability to drill to 3,500 feet and with reaming bits up to 64-inches in diameter:
  - ownership of least 3 complete drilling string assemblies (including bits, collars, drill pipe and any necessary fittings) that could be used to drill to 3,500 feet and with reaming bits up to 64-inches in diameter.
  - expertise and experience in managing, maintaining and routinely inspecting equipment listed above.
- g) Capability to provide 2 drilling rigs for simultaneous installation of a large diameter casings from 24-inch up to 60-inch in diameter. The drilling rigs must allow the casings to pass through the rig floor. The hook load rating shall be 750,000 lbs. or greater.

3. *Personnel Requirements*

The Submitter(s) must provide sufficient, competent, and physically capable personnel to perform all work in accordance with the conditions and specifications of the RFQ documents. The Submitter(s) shall provide phone number and email address for at

least one contact person in a supervisory capacity able to provide information regarding Project status, and perform other supervisory tasks.

## F. Definitions

The following words and expressions used in this Solicitation shall be construed as follows, except when it is clear from the context that another meaning is intended:

1. **Request For Quote (RFQ)** – An invitation where pre-qualified Submitters are invited to quote on a specific product or service. Any RFQ issued under this RTQ will include a project specific scope of services, technical specifications, site conditions (e.g., access, use of existing utilities such as water/electric/restroom availability), and applicable terms conditions, or requirements including but not limited to: pre-bid/site visit, payment requirements such as retainage, time for performance, any submittal requirements, material and method of removal including dewatering and disposal requirements, volume of discharge flow, safety manual, confined space entry plan, construction schedules, schedule of values, bid and/or performance bond requirements, any release of claim requirements, increases insurance coverages, liquidated damage provisions, additional warranty requirements, if the work is to be performed at night or on weekends, type of payment, deficiencies, Community Work Force and Responsible Wage (90-143), as well as any additional requirements.
2. **Submitter** – shall refer to anyone responding to this Request to Qualify.
3. **Submittal** – shall refer to the form submitted in response to this Request to Qualify.
4. The words **“Work”**, **“Services”**, **“Program”**, **“Deliverable”** or **“Project”** to mean all matters and things that will be required to be done by the Vendor(s) in accordance with the Scope of Services and the Terms and conditions of this Solicitation.
5. The words **“Work Order”** to mean a document that defined and describes the parameters of individual projects assigned or awarded by the County to the Vendor in accordance to the terms of the Contract.

## 2.2. BID GUARANTY

Bid Guaranty or Bid Bond may be required if so defined in the RFQ in an amount not to exceed 5% of the full bid price.

## 2.3. PERFORMANCE AND PAYMENT BOND

The scope of work as listed in subsequent RFQ may require a Performance and/or Payment Bond. If so required it will be detailed in the subsequent RFQ.

## 2.4. INDEMNIFICATION AND INSURANCE

The scope of work as listed in subsequent RFQ may increase insurance coverages. If so required it will be detailed in the subsequent RFQ.

## 2.5. SMALL BUSINESS CONTRACT MEASURES

Section 1 from the General Terms and Conditions, Paragraph 1.44 - Small Business Enterprises (SBE) Measures, is exempt from this RTQ. The application of measures will be determined at the time the Request for Quote is issued and may include but not be limited to, a trade set-aside, a goal, bid preference or other measures. All individual RFQ's will be reviewed by SBD for applicable measures prior to advertising.

**2.6. LABOR, MATERIALS, AND EQUIPMENT**

Unless otherwise provided in any subsequent Request for Quote, the Submitters shall furnish all labor, material and equipment necessary for satisfactory Work Order/ Project performance. When not specifically identified in the specifications, such materials and equipment shall be of a suitable type and grade for the purpose. All material, workmanship, and equipment shall be subject to the inspection and approval of the County's Project Manager or designee.

**2.7. NOTIFICATION TO BEGIN WORK**

The Submitter(s) shall neither commence any work, nor enter a County work premise, until a Notice to Proceed directing the Submitter(s) to proceed with various items of work has been received from any authorized County representative; provided however, that such notification shall be superseded by any emergency work that may be required in accordance with provisions included elsewhere in this solicitation and resultant contract.

**2.8. WORK ACCEPTANCE**

Projects will be inspected by an authorized representative of the County. This inspection shall be performed to determine acceptance of work, appropriate invoicing, and warranty conditions.

**2.9. LIQUIDATED DAMAGES**

Liquidated damages shall apply, as specified for each RFQ.

**2.10. MIAMI-DADE COUNTY RESPONSIBLE WAGE ORDINANCE**

Provisions of Miami-Dade County Code Section 2.11.16 will apply to any RFQ awarded pursuant to this Solicitation that exceeds \$100,000. By submitting a bid pursuant to these specifications, a Submitter is hereby agreeing to comply with the provisions of Section 2.11.16, and to acknowledge awareness of the penalties for noncompliance. The supplemental general conditions for current calendar year can be found by accessing the following link: <http://www.miamidade.gov/smallbusiness/responsible-wages-and-benefits.asp> for Responsible Wages and Benefits Schedule: Heavy Construction. However, the RFQ will include the applicable Responsible Wages and Benefits Schedule for each specific Project. The Submitter is advised that the Wages and Benefits Schedule will be reviewed and increased, if appropriate, once a year, on January 1st. The rates for wages and benefits to be paid for work performed under this Contract and during each subsequent calendar year will be the rate in effect on January 1st of the year in which the work is performed

**2.11. ACCIDENT PREVENTION AND REGULATIONS**

All operations on Miami-Dade County roadways are under the direct control of the Municipality in which the roadway is located, the Miami-Dade Public Works and Waste Management Department for County owned roads or Florida Department of Transportation for State owned roads. All work performed on Miami-Dade Sanitary Sewer Lines additionally falls under the direction of the Miami-Dade Water and Sewer Department. All Maintenance of Traffic Plans (MOT) must be filed with and approved by the respective governing body with jurisdictional control of the roadway. Failure to have an approved and fully implemented MOT plan may cause the job to be shut down until corrective action is taken. The vendor will not be compensated by delays created by such shut downs.

Pre-qualified vendor(s) shall comply with the all OSHA, FDOT, Miami-Dade County and Municipal rules, including Florida Statutes CHAPTER 553 PART III TRENCH SAFETY ACT.

**2.12. UNDERGROUND UTILITIES**

Pre-qualified vendors are responsible for obtaining all underground utility clearances. All utilities within the right-of-way must be indicated on the site drawings. In addition, a number will be issued by the utility locating company, which must be listed on the permit application.

**2.13. COMPLIANCE/ REGULATIONS**

All items to be purchased under this contract shall be in accordance with all governmental standards, to include, but not be limited to, those issued by the Occupational Safety and Health Administration (OSHA), the National Institute of Occupational Safety Hazards (NIOSH), and the National Fire Protection Association (NFPA).

**2.14. DELEGATION OF AUTHORITY**

In accordance with Section 2-8.2.12 of the Code of Miami-Dade County, the Water & Sewer Super Acceleration Ordinance No. 14-77, authority is hereby granted to the County Mayor or Mayor's designee to advertise, award, amend and negotiate this pool for the Miami-Dade Water and Sewer Department, to extend pool duration, to execute change orders and to settle claims without need for prior approval from the Board of County Commissioners.

## **SECTION 3 – TECHNICAL SPECIFICATIONS**

### **3.1. BACKGROUND**

Miami-Dade County, hereinafter referred to as the County, as represented by the Miami-Dade Water and Sewer Department (WASD), is seeking the services of qualified firms to provide Deep Injection Well Drilling Services. WASD prepared a preliminary Ocean Outfall Legislation (OOL) Compliance Plan and submitted the plan to the Florida Department of Environmental Protection in July 2013. The Injection Well Plan has been updated several times; the latest Plan update is dated May 2017. The legislation requires that WASD limit use of ocean outfalls to 5 percent of the baseline flow by the end of 2025, reduce the nutrient load discharged in the outfalls to a target goal before 2025, and install a technically and economically feasible reuse system with a capacity of 117.5 million gallons per day on an annual basis of treated wastewater. OOL Compliance Plan details Injection Wells permitting, construction, and testing schedule required to meet the December 31, 2025 deadline of OOL. This Injection Well Plan will be flexible and modified as the OOL Program progresses to account for the changes that may occur with other program facilities permitting, and future hydrogeological data collection.

### **3.2. OBJECTIVE**

WASD's OOL Compliance Plan provides greater detail on how to reduce nutrient loadings and redirect effluent discharges from the ocean outfalls to Injection Wells. The objective of this solicitation is to establish a Pool of pre-qualified vendors with applicable expertise to provide Injection Wells Drilling and Construction.

### **3.3. PROGRESS MEETINGS**

The County may hold periodic meetings, at the discretion of the County Project Manager or designee, for the purpose of discussing issues relevant to the performance and/or administration of the services provided by the selected vendor. The County Project Manager or designee reserves the right to call meetings at any time by notifying selected vendor. The selected vendor's Project Manager or other appropriate person, as requested by the County, shall be present at all meetings scheduled by the County Project Manager or designee unless specifically waived by the County Project Manager or designee. In emergency cases, advance notice is not required.

### **3.4. DESIRED SERVICES TO BE PROVIDED/ SCOPE OF WORK**

Implementation of the Ocean Outfall Legislation (OOL) Program requires unique set of skills, experience, and equipment. Included in this section the Scope of Work (SOW) that is comprised of the following:

- Table containing the Number, Type, and Location of Wells.
- Summary of Work
- Attachment 1 - Wastewater Treatment Plant Site Maps.

### 3.5. PROPOSED INJECTION WELLS

**Table 1. Estimated Number and Location of New Wells**

	Wastewater Treatment Plant Sites				Total Number of New Wells
	North District	Central District	South District	West District	
Number of New 24-in Injection Wells, with 1 Well Out of Service	4	7	3	9	23
Number of Dual-zone Monitoring Wells	2	4	1	5	12
Program Project Code	NE-5	CE-2	SE-2	WE-2	

In summary, the SOW consists of drilling 23 new Injection Wells and approximately 12 nearby Floridan aquifer dual-zone monitoring wells by 2025 at the four wastewater treatment plant sites: North District, Central District, South District, and West District. The Injection Wells will have capacities of 18.65 million gallons per day and assumes that the well will be constructed with a 24-inch diameter final casing to a depth between 3,200 feet and 3,500 feet. If larger (e.g., 36-inch) final diameter casings are used at a few locations, the total number of wells installed could be reduced.

The SOW is based on the Injection Well Implementation Plan, which is a dynamic plan that will be updated annually or more frequently to accommodate broader programmatic updates to projected plant flows, storage, and both OOL and Consent Decree (CD) facilities site plans. Furthermore, there is inherent uncertainty in subsurface drilling conditions and the ultimate performance of each individual well. As such, the SOW is subject to some variability in the precise number, location, and size of wells at the four wastewater treatment plant sites. In addition, the SOW is predicated on the assumption that the work at the West District Wastewater Treatment Plant site will commence in 2019 and will allow access to the site for drilling approximately nine deep injection wells and associated monitoring wells under this procurement. Any of the variables identified above may affect the overall number and location of wells and, therefore, this SOW is subject to change as the program progresses.

#### 3.5.1 Summary of Work

The following sequence of construction details the activities for installation of Class I municipal injection wells and associated dual-zone Floridan aquifer monitoring wells. This summary of work is intended to be representative only.

#### 3.5.2 Scope of Work

A. Prior to commencement of any work, vendor shall submit to WASD for approval a detailed sequence of construction, clearly showing the interrelationship and the interdependency of work activities with one another.

B. The work of this Project is to be performed on the sites of existing and operating waste water treatment plants. Identify and properly schedule all steps that may be necessary for the completion of the Project. Coordinate and agree to such schedule with the Plant Superintendents.

C. Coordinate sequence of construction with progress schedule to ensure timely performance of the work and project completion within the specified construction time.

### 3.5.3 General Overview

A. The following sequence of construction shall be followed, but the vendor shall submit a detailed sequence of construction which must be approved by WASD before any work is started. The Department reserves the right to make changes to the sequence as necessary to facilitate the work or minimize any conflict with Plant operations.

B. The example sequence of work assumes a typical 24-inch diameter final casing. WASD may choose to construct larger diameter injection wells with 30 to 36 inch final casings. Selected vendor shall have the capability to construct wells with up to 36 inch final casings.

### 3.5.4 General Sequence

The Project consists of furnishing all materials, labor and equipment necessary to construct industrial and municipal injection and wells to approximately 3,500 feet deep and their associated dual-zone monitoring wells.

#### A. General:

1. The vendor and WASD may at times discuss and mutually agree to conduct one or more of the steps described on this sequence in a different order (either advance or defer a task), if such action proves to add efficiency or facilitates the prompt completion of the project. Provided that such variation does not compromise any safety guidelines, a standard, or approved procedure. In the event that one or more of these agreements are reached, this shall not warrant or require a Change Order under any circumstance and shall be done at no additional cost the County.
2. After installation of all items for each specific Project, acceptance tests shall be performed by the vendor and witnessed by WASD. These tests shall include complete operational testing.

#### B. Mobilization/ Submittals/Layout/Preparation:

1. Vendor shall not commence work until the Cost Loaded Base Line Construction Schedule has been approved.
2. Vendor shall mobilize at the locations designated by WASD on the jobsites. The Mobilization shall include setting up the vendor's field office facilities and designation of the vendor's Project Management and Supervisory personnel.
3. Submit, revise/correct and complete to the satisfaction and approval of WASD, the Project Base-Line, Cost-Loaded Construction Schedule and Project Schedule of Values.
4. Submit and correct as to the approval and satisfaction of WASD, all Submittal Data and Shop Drawings for all long lead material and equipment items which, in the opinion of WASD, need immediate submission for coordination, timely fabrication and/or delivery.
5. Apply for and obtain all necessary and required Building Department Permits and other Permits as required or necessary to complete the work.
6. Mobilization and Site Preparation: The vendor is hereby advised that the following construction related activities are representative of the WORK, but their sequence may be changed by the County relative to order of occurrence, or deletion. The proposed WORK sequence is as follows:
  - Install temporary services.
  - Conduct a video survey of the site to document existing site conditions.
  - Clear site and establish vertical and horizontal control with reference to NAVD 1988 and NAD 1983, respectively.
  - Mobilize drilling and other required materials and equipment required for construction.

C. Municipal Injection Wells Drilling and Testing:

The vendor is hereby advised that the following construction related activities are representative of the WORK, but the sequence of testing such as coring, straddle-packer testing, and geophysical logging, etc., may be changed by WASD relative to order of occurrence, or deletion, or additional testing that may be added. No drilling or testing on the Injection Well shall take place until above is complete to the satisfaction of WASD.

1. Construct of temporary concrete or steel drilling and fluid containment pad for the Injection Well as shown on the drawings to be provided with each RFQ.
2. Install, develop and sample four (4) 2-inch diameter PVC shallow water table pad monitor wells as shown on the drawings.
3. Mobilize and set up drilling rig and equipment.
4. Drill a pilot hole with a 12.25-inch diameter bit to approximately 350 feet below land surface (bls) using the direct mud rotary method.
5. Conduct geophysical logging.
6. Back-plug the pilot hole with cement to the base of the pit casing.
7. Ream the pilot hole to a nominal 62-inch diameter borehole with a step reaming bit to approximately 300 feet bls using the direct mud rotary method.
8. Conduct geophysical logging.
9. Install the 54-inch diameter steel casing to approximately 300 feet bls and cement to surface.
10. Drill out cement plug and drill a pilot hole centered at the bottom of the 54-inch diameter steel casing with a 12.25-inch diameter bit to approximately 1,100 feet bls using the direct mud rotary method.
11. Conduct geophysical logging.
12. Back-plug the pilot hole with cement to the base of the 54-inch diameter steel casing.
13. Ream the pilot hole to a nominal 54-inch diameter borehole to approximately 1,000 feet bls using the direct mud rotary method.
14. Conduct geophysical logging.
15. Install the 44-inch diameter steel casing to approximately 1,000 feet bls and cement to surface. After each cement stage, perform static temperature and natural gamma ray logs to confirm the top of cement in conjunction with measurement from tremie pipe hard tags.
16. Install a Washington Rotating Head, or comparable flow prevention device, as approved by the WASD, to control flow at the artesian head pressures within the Floridan Aquifer System during reverse-air circulation drilling.
17. Drill out cement plug and drill a pilot hole centered at the bottom of the 44-inch diameter steel casing with a 12.25-inch diameter bit to approximately 1,850 feet bls using the reverse-air circulation method. Collect water quality samples.
18. During drilling of the pilot hole collect four (4) rock cores at depths selected by the WASD.
19. Conduct static geophysical logging on the pilot hole.
20. Conduct a pump test for dynamic geophysical logging. Collect water quality samples. Dispose of produced settled water.
21. Conduct up to four (4) packer tests in the pilot hole. Collect water quality samples. Dispose of produced settled water.
22. Back-plug the pilot hole to the base of the 44-inch diameter steel casing setting depth of approximately 1,000 feet bls.
23. Ream the pilot hole to a nominal 42-inch diameter borehole to approximately 1,800 feet bls using the reverse-air circulation method.
24. Conduct geophysical logging.
25. Install the 34-inch diameter steel casing to approximately 1,800 feet bls and cement to surface. After each cement stage, perform static temperature and natural gamma ray logs to confirm the top of cement in conjunction with measurement from tremie pipe hard tags.

26. Drill out cement plug and drill a pilot hole centered at the bottom of the 34-inch diameter steel casing with a 12.25-inch bit to approximately 3,500 feet bls using the reverse-air circulation method. Collect water quality samples.
27. During drilling of the pilot hole collect six (6) rock cores at depths selected by the WASD.
28. Conduct static and dynamic geophysical logging on the pilot hole. Dispose of produced settled water.
29. Conduct up to four (4) packer tests in the pilot hole and Collect water quality samples. Dispose of produced settled water.
30. Install drillable bridge plug approximately 20 feet below the 24-inch final seamless steel casing setting depth (approximately 2,900 feet bls).
31. Ream the pilot hole to a nominal 34-inch diameter borehole to approximately 2,900 feet bls using the reverse-air circulation method.
32. Conduct geophysical logging.
33. Install the 24-inch diameter final seamless steel casing to approximately 2,900 feet bls and conduct a modified cement bond log on the casing, before cementing.
34. Cement the 24-inch diameter final seamless steel casing. After each cement stage, perform static temperature and natural gamma ray logs to confirm the top of cement in conjunction with measurement from tremie pipe hard tags.
35. Conduct a cement bond log following completion of cementing of the 24-inch diameter final seamless steel casing to within 200 feet of land surface. Complete cementing of 24-inch diameter final steel casing following logging.
36. Conduct internal mechanical integrity testing of the 24-inch diameter final seamless steel casing by performing a casing pressure test (minimum of 150 psi).
37. Develop the well (injection zone). Dispose of produced settled water.
38. Collect background water quality sample for laboratory analysis of Primary and Secondary Drinking Water Standards.
39. Complete installation of wellhead fittings and valves.
40. Furnish and install temporary piping, pumps, and valves to deliver clean and clear potable water for conducting a color video survey for the final inspection of the well.
41. Conduct a step injection test of the completed Injection Well. The injection test will be conducted following completion of the dual-zone monitor well.
42. Conduct external mechanical integrity testing by performing a High Resolution Temperature Log and a Radioactive Tracer Survey.
43. Relocate drilling rig and equipment from the Injection Well site to the associated Dual-Zone Monitor Well site.

D. Dual-Zone Monitor Well Drilling and Testing:

The vendor is hereby advised that the following construction related activities are representative of the WORK, but the sequence of testing such as coring, straddle-packer testing, and geophysical logging, etc., may be changed by WASD relative to order of occurrence, or deletion, or additional testing that may be added. No drilling shall commence on the construction of the Dual Zone Monitor Well until after the setting and cementing of the final casing in and completion of the foundation for drilling equipment and steel fluid containment pad for the Dual-Zone Monitor Well.

1. Construct of temporary concrete or steel drilling and fluid containment pad for the Dual-Zone Monitor Wells as shown on the drawings.
2. Install, develop and sample four (4) 2-inch diameter PVC shallow water table pad monitor wells as shown on the drawings.
3. Relocate and set up drilling rig and equipment.
4. Excavate fill materials and install 46-inch diameter pit casing to a depth selected by the vendor required for the drilling system. Excavated fill materials shall be stockpiled onsite at the location designated by the Water and Sewer's Department's Project Manager.
5. Drill a pilot hole with 12.25-inch bit to approximately 350 feet bls using the direct mud rotary method.
6. Conduct geophysical logging.

7. Ream pilot hole to a nominal 46-inch diameter borehole to the 36-inch diameter steel casing depth of approximately 300 feet bls using the direct mud rotary method.
8. Conduct geophysical logging.
9. Install the 36-inch diameter steel casing to approximately 300 feet bls and cement to surface.
10. Drill out cement plug and drill a pilot hole with a 12.25-inch bit centered at the bottom of the 36-inch diameter steel casing to approximately 1,100 feet bls using the direct mud rotary method.
11. Conduct geophysical logging.
12. Back-plug the pilot hole to the base of the 36-inch diameter steel casing.
13. Ream a nominal 36-inch diameter borehole to approximately 1,000 feet bls using the direct mud rotary method.
14. Conduct geophysical logging.
15. Install the 26-inch diameter steel casing to approximately 1,000 feet bls and cement to surface. After each cement stage, perform static temperature and natural gamma ray logs to confirm the top of cement in conjunction with measurement from tremie pipe hard tags.
16. Install a Washington Rotating Head or comparable flow prevention device as approved by WASD to control artesian flow from the well at head pressures within the Floridian Aquifer System during reverse-air circulation drilling.
17. Drill out cement plug and drill a pilot hole centered at the bottom of the 26-inch diameter steel casing with a 12.25-inch diameter bit to approximately 1,700 feet bls using the reverse-air circulation method. Collect water quality samples.
18. Conduct static and dynamic geophysical logging in the pilot hole from the bottom of the 26-inch diameter casing. Dispose of produced settled water.
19. Conduct up to two (2) packer tests at depths selected by the WASD. Collect water quality samples. Dispose of produced settled water.
20. Install drillable bridge plug at the 16-inch diameter steel casing setting depth of approximately 1,140 feet bls.
21. Ream the pilot hole to a nominal 26-inch diameter to the 16-inch diameter steel casing depth of approximately 1,140 feet bls using the reverse-air circulation method.
22. Conduct geophysical logging.
23. Install the 16-inch diameter steel casing to approximately 1,140 feet bls and cement in place to within approximately 100 feet of land surface. After each cement stage, perform static temperature and natural gamma ray logs to confirm the top of cement in conjunction with measurement from tremie pipe hard tags.
24. Conduct a standard cement bond log following required cement curing time. Complete cementing of the 16-inch diameter final steel casing.
25. Install temporary wellhead appurtenances, conduct internal mechanical integrity testing of the 16-inch diameter steel casing by performing a casing pressure test (minimum 100 psi).
26. Drill out cement plug and drill a pilot hole centered at the bottom of the 16-inch diameter steel casing with 12.25-inch bit to remove the drillable bridge plug and backfill to the 6.625-inch diameter Redbox 1250 FRP casing (or approved equal) setting depth of approximately 1,700 feet bls using reverse-air circulation. Collect water quality samples.
27. Conduct static and dynamic geophysical logging on the pilot hole. Dispose of produced settled.
28. Back-plug the pilot hole, if required, to establish the base of the lower monitor zone (LMZ).
29. Install 6.625-inch diameter Red Box 1250 FRP (or approved equal) T&C casing with attached external cementing packer to an approximate depth of 1,700 feet bls; cement up to a depth approximately 150 feet above the bottom of the casing. The open annulus around the partially cemented 6.625-inch casing provides an upper monitor zone (UMZ); the open-hole below the 6.625-inch casing provides a lower monitor zone (LMZ). After each cement stage perform static temperature and natural gamma ray logs to confirm the top of cement in conjunction with measurement from tremie pipe hard tags.
30. Conduct a standard cement bond log on the 6.625-inch casing following required cement curing time.

31. Install temporary wellhead appurtenances, conduct internal mechanical integrity testing of the 6.625-inch casing by performing a pressure test (minimum 100 psi).
32. Develop the LMZ and UMZ. Collect water quality samples from the LMZ and UMZ for laboratory analysis of Primary and Secondary Drinking Water Standards. Dispose of produced settled water.
33. Perform final inspection of 6.625-inch casing by running a caliper log (open-hole only) and color video survey while flowing or pumping groundwater from the LMZ. Dispose of produced settled water.
34. Complete installation of wellhead assembly and appurtenances.
35. Furnish and install temporary pressure transducer equipment in the UMZ and LMZ of the completed dual-zone monitor wells to measure and record artesian head (elevation).

E. De-Mobilization and Site Restoration:

The vendor is hereby advised that the following construction related activities are representative of the WORK, but their sequence may be changed by WASD relative to order of occurrence, or deletion. The proposed WORK sequence is as follows:

1. Remove drilling rig and related equipment from the site.
2. Demobilize all remaining equipment and materials.
3. Landscaping and sodding work can be done parallel with above activities.
4. Cleanup, property restoration and paving repairs shall follow as closely behind the completion of testing as possible, followed by a final inspection and cleanup when all other work is completed.
5. Restore site, walks, asphalt paving, sodding, and pavements to original or better condition.
6. Perform final cleanup and testing, and remove all debris and excess material from site.
7. Submit all final Record (As-Built) Drawings along with spare parts, supplies, and tools.
8. Perform all work required in punch list items as of Substantial Completion.
9. Request Final Inspection and submit final Requisition for Payment.
10. While performing the work in the above described sequence, all requirements of the specifications shall be strictly followed. Perform prompt cleanup and removals as the work progresses.

**3.5.5 Additional Factors**

Vendor(s) shall not work or perform any operations during inclement weather. In the event of a severe flood warning, tropical storm warning, or a hurricane warning; the vendor(s) may submit a written request for additional time to complete scheduled work.

**SECTION 4 – BID SUBMITTAL**

TO BE COMPLETED BY ALL SUBMITTER(S)

Refer to Paragraph 2.1.F, Qualifications to ensure that your firm’s responses and attachments comply with the Solicitation requirements.

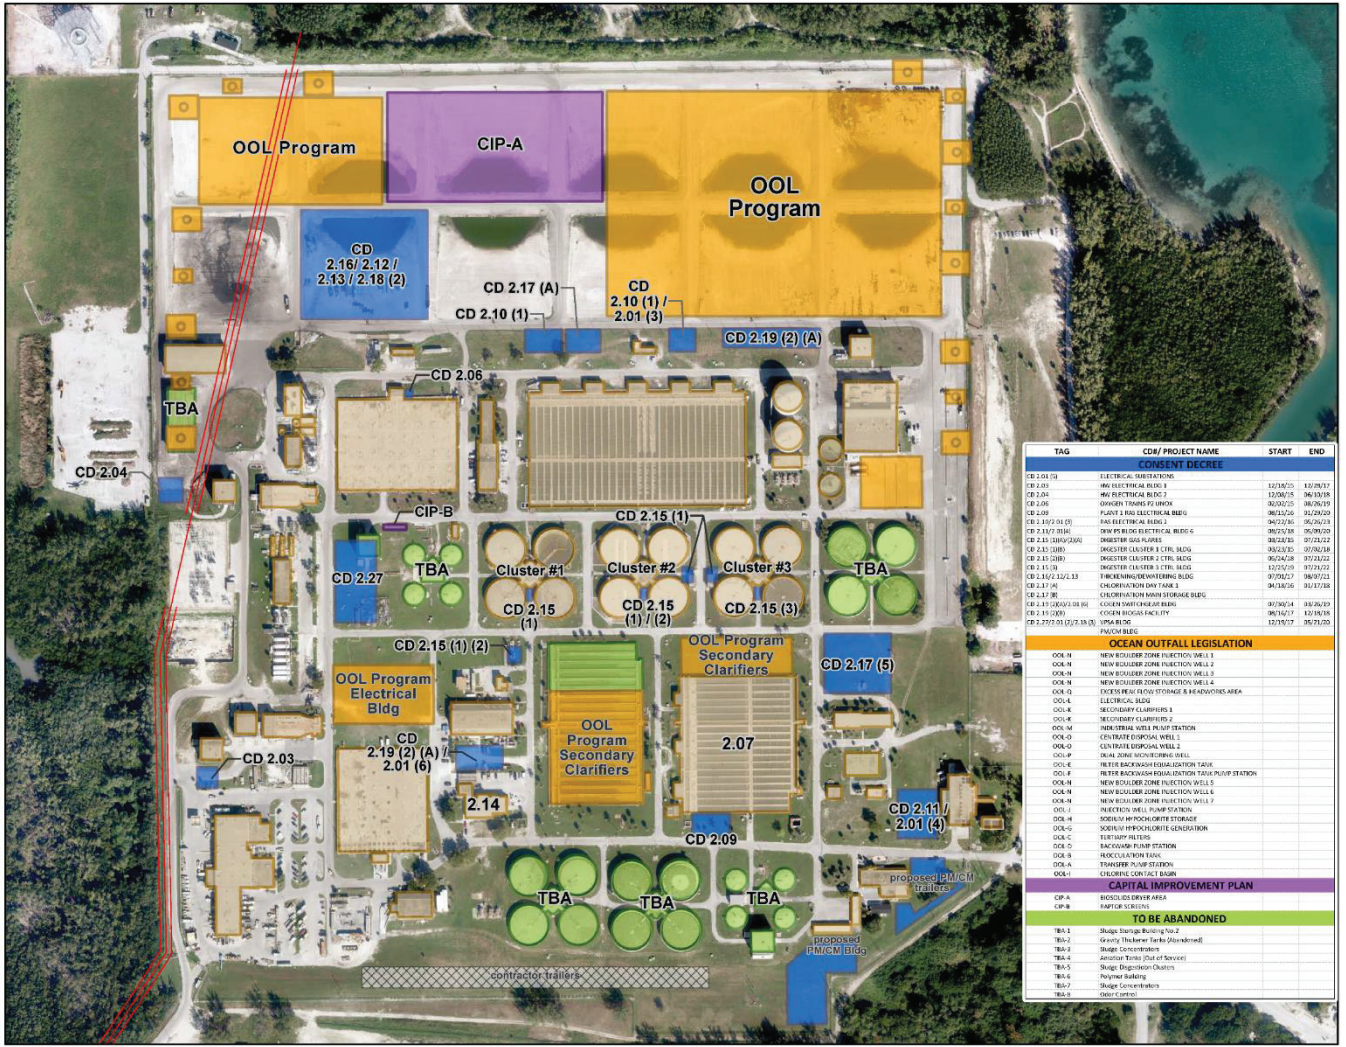

REFERENCE	MINIMUM QUALIFICATION REQUIREMENTS
	Submitters shall hold following and will be required to provide copies of all licenses with their response to this solicitation
	1) State of Florida Certified General Contractor’s license. License # _____ Expiration Date: _____
	2) State of Florida Water Well Contractor’s license. License # _____ Expiration Date: _____

REFERENCE	GENERAL QUALIFICATION REQUIREMENTS
	Submitters must meet following experience requirements and where applicable provide proof of equipment ownership.
	<b>A. Successful completion of 3 Underground Injection Control ( UIC) Class I Deep Injection Wells, with a minimum casing diameter of 24-inches to a depth of at least 2,500 feet in Florida, within the past ten (10) years.</b> <i>The Vendor shall list three(3) references/projects demonstrating experience, ability and expertise in managing projects of similar size:</i>
A.1.	For each project, provide UIC Permit Number, Owner’s Name and Contact Information, including email.
A.2.	For each project, has the respondent conducted 10 or more packer pumping tests at depths of 1,500 feet or greater to demonstrate confinement?
A.3.	For each project, has the respondent collected the requested samples or data to support all of the following : FDEP casing seat requests, monitoring zone requests, short-term injection testing requests and requests to commence operational testing?
A.4.	Experience & expertise in providing log-derived TDS plots. For each project, has the respondents provided log-derived TDS plots to support identification of the base of underground courses of drinking water?
	<b>Project #1</b>
	<b>Please provide the following information according to requirement A.1. above</b> UIC Permit Number _____ Owner’s Name _____ Date Completed _____ Contact Name _____ Contact Phone No. _____ Contact Email _____ Project Description _____ _____ _____
	<b>For this project, please provide the following responses to requirements A.2. , A.3., and A.4 above:</b> Response for A.2., above: (Yes/No) _____ Response for A.3., above: (Yes/No) _____ Response for A.4, above: (Yes/No) _____
	<b>Project #2</b>
	<b>Please provide the following information according to requirement A.1. above</b> UIC Permit Number _____ Owner’s Name _____ Date Completed _____ Contact Name _____ Contact Phone No. _____ Contact Email _____ Project Description _____ _____ _____
	<b>For this project, please provide the following responses to requirements A.2. , A.3., and A.4 above:</b> Response for A.2., above: (Yes/No) _____ Response for A.3., above: (Yes/No) _____ Response for A.4, above: (Yes/No) _____

<b>Project #3</b>	
<b>Please provide the following information according to requirement A.1. above</b>	
UIC Permit Number _____	Owner's Name _____
Date Completed _____	Contact Name _____
Contact Phone No. _____	Contact Email _____
Project Description _____ _____	
<b>For this project, please provide the following responses to requirements A.2. , A.3., and A.4. above:</b>	
Response for A.2., above: (Yes/No) _____	
Response for A.3., above: (Yes/No) _____	
Response for A.4., above: (Yes/No) _____	
<b>B. Capability to construct a 54-inch borehole to 1,500 feet below land surface</b>	
<ul style="list-style-type: none"> <li>• Does the respondent own drilling fluid circulation systems with capacities, pumps, and tanks capable of constructing a 54-inch borehole to 1,500 feet below land surface: (Yes/No) _____</li> <li>• Does the respondent possess successful experience, ability and expertise to manage drilling fluid circulation systems with capacities, pumps, and tanks to construct a 54-inch borehole to 1,500 feet below land surface: (Yes/No) _____</li> </ul>	
<b>C. Capability to construct a 24-inch injection well to 3,000 feet below land surface</b>	
<ul style="list-style-type: none"> <li>• Does the respondent own cementing equipment, mixing capacity, pumping capacity, pressure capacity and dry cement storage volume capable of constructing a 24-inch injection well to 3,000 feet below land surface: (Yes/No) _____</li> <li>• Does the respondent possess successful experience, ability and expertise to manage cementing equipment, mixing capacity, pumping capacity, pressure capacity and dry cement storage volume capable of constructing a 24-inch injection well to 3,000 feet below land surface: (Yes/No) _____</li> </ul>	
<b>D. Capability to reserve air drill a 34-inch borehole to 3,400 feet</b>	
<ul style="list-style-type: none"> <li>• Does the respondent own the equipment necessary to reserve air drill a 34-inch borehole to 3,400 feet?: (Yes/No) _____</li> <li>• Does the respondent possess successful experience, ability and expertise to manage equipment necessary to reserve air drill a 34-inch borehole to 3,400 feet: (Yes/No) _____</li> </ul>	
<b>E. Capability to drill to 3,500 feet and with reaming bits up to 64-inches in diameter</b>	
<ul style="list-style-type: none"> <li>• Does the respondent own at least 3 complete drilling string assemblies (including bits, collars, drill pipe and any necessary fittings) that could be used to drill to 3,500 feet and with reaming bits up to 64-inches in diameter. (Yes/No) _____</li> <li>• Does the respondent possess successful experience, ability and expertise to manage, maintain and routinely inspect at least 3 complete drilling string assemblies (including bits, collars, drill pipe and any necessary fittings) that could be used to drill to 3,500 feet and with reaming bits up to 64-inches in diameter.: (Yes/No) _____</li> </ul>	
<b>F. Capability to provide at least 2 drilling rigs for simultaneous installation of a large diameter casings from 24-inch up to 60-inch in diameter. The drilling rigs must allow the casings to pass through the rig floor. The hook load rating shall be 750,000 lbs. or greater.</b>	
<ul style="list-style-type: none"> <li>• Does the respondent own at least 2 drilling rigs for simultaneous installation of a large diameter casings from 24-inch up to 60-inch in diameter. The drilling rigs must allow the casings to pass through the rig floor. The hook load rating shall be 750,000 lbs. or greater. (Yes/No) _____</li> <li>• Does the respondent possess successful experience, ability and expertise to manage these rigs for simultaneous installation of a large diameter casings from 24-inch up 60-inch in diameter (drilling rigs must allow the casings to pass through the rig floor, with hook load rating be 750,000 lbs. or greater) (Yes/No) _____</li> </ul>	
<b>REFERENCE</b>	<b>PERSONNEL QUALIFICATION REQUIREMENTS</b>
<ul style="list-style-type: none"> <li>• Respondent shall provide name, phone number and email address for an employee, in a supervisory capacity, that will be able to provide information regarding Project status and perform other supervisory tasks: Name _____ Email _____ Contact Phone No. _____</li> <li>• Does the respondent possess the ability to provide sufficient number of competent and physically capable personnel to perform all work (Yes/No) _____</li> </ul>

**ADDENDUM NO. 1****DATE: July 26, 2017****TO: ALL PROSPECTIVE BIDDERS****SUBJECT: SOLICITATION NO. RTQ-00566****TITLE: INJECTION WELLS PREQUALIFICATION POOL**

This Addendum No. 1 becomes part of the above mentioned bid.

**I. QUESTIONS RECEIVED AND ANSWERS:**

Q1. How much will be the construction estimate?

A1. The cost will be based on each project specific scope of services, technical specifications, site conditions, as well as any additional requirements.

Q2. Have you issued any addenda for this project?

A2. No.

Q3. I would like to ask a copy of the bidders list?

A3. Please see BidSync RTQ-00566 Bidder Notification Report attached.

Q4. Who is the Engineer or Architect that's working with this?

A4. MWH Americas, Inc.

Q5. May I have the complete address of the construction site?

A5. Site addresses are as follows:

- **Site 1: Central District Wastewater Treatment Plant:** 3989 Rickenbacker Causeway, Miami FL 33149
- **Site 2: South District Wastewater Treatment Plant:** 8950 SW 232 Street, Miami, FL, 33190-1301
- **Site 3: North District Wastewater Treatment Plant:** 2575 NE 156 Street, North Miami, Florida, 33160-4618
- **Site 4: Currently Vacant Land:** Proposed Facility to be constructed in Western Miami-Dade County

**All terms, covenants and conditions of the subject solicitation and any addenda issued thereto shall apply, except to the extent herein amended.**

Miami-Dade County

**ADDENDUM NO. 2**

**DATE: August 2, 2017**

**TO: ALL PROSPECTIVE BIDDERS**

**SUBJECT: SOLICITATION NO. RTQ-00566**

**TITLE: INJECTION WELLS PREQUALIFICATION POOL**

This Addendum No. 2 becomes part of the above mentioned bid.

**I. QUESTIONS RECEIVED AND ANSWERS:**

Q1. Youngquist Brothers, Inc. (YBI) has the following questions and/or requests for clarification regarding the above described Solicitation. Your review and response would be appreciated. Please describe the anticipated sequence and estimated timetable for contracting and performance of the work in it's various elements.

A1. The anticipated sequence and estimated timetable is included in the *Ocean Outfall Legislation Program Compliance Plan 2016* that can be accessed via <http://www.miamidade.gov/water/ocean-outfall-legislation.asp>

Q2. Please provide a link to access the current Injection Well Plan mentioned in Section 3.1.

A2. The link to the *Ocean Outfall Legislation Program Compliance Plan 2016* which contains Injection Well Plan is <http://www.miamidade.gov/water/ocean-outfall-legislation.asp>

Q3. BID SUBMITTAL REF A.2

This requests confirmation of performance of 10 or more packer pumping tests, deeper than 1500 feet to "demonstrate confinement" "For each project" ... used as a reference. While all Injection Well Projects require packer testing and several packer tests are generally performed to support the demonstration of confinement, no project to my knowledge has required 10 for that purpose. A typical Injection Well project may require from 4 to 10 packer tests, some for water quality definition and some for supporting the demonstration of confinement. (YBI has performed over 1,000 such packer tests for both purposes). We might suggest a more appropriate question would be "has the respondent performed multiple packer tests for the purposes of defining water quality and supporting the determination of confinement on the projects listed."

A3. See revised SECTION 4-BID SUBMITTAL form provided as an attachment to this Addendum No.2

Q4. SUBCONTRACTOR / SUPPLIER LISTING

This form is included in the Solicitation documents. As this Solicitation is to determine qualifications, no suppliers or subcontractors are selected at this time. Please confirm if this form is to be submitted with this Request for Qualification?

A4. Subcontractor/Supplier Listing form must be submitted in accordance with Ordinance No. 11-90.

**II. CHANGES TO THE SOLICITATION:**

Section 4-Bid Submittal form is deleted in its entirety and replaced with revised Section 4-Bid Submittal provided as an attachment to this Addendum No.2

**All terms, covenants and conditions of the subject solicitation and any addenda issued thereto shall apply, except to the extent herein amended.**

Miami-Dade County

**NATALYA VASILYEVA**

Natalya Vasilyeva  
Procurement Contracting Officer II

Attachment: revised Section 4-Bid Submittal form

c: Clerk of the Board

**SECTION 4 – BID SUBMITTAL (revised)**

TO BE COMPLETED BY ALL SUBMITTER(S)

Refer to Paragraph 2.1.F, Qualifications to ensure that your firm’s responses and attachments comply with the Solicitation requirements.

REFERENCE	MINIMUM QUALIFICATION REQUIREMENTS
Submitters shall hold following and will be required to provide copies of all licenses with their response to this solicitation	
1) State of Florida Certified General Contractor’s license. License # _____	Expiration Date: _____
2) State of Florida Water Well Contractor’s license. License # _____	Expiration Date: _____

REFERENCE	GENERAL QUALIFICATION REQUIREMENTS
Submitters must meet following experience requirements and where applicable provide proof of equipment ownership.	
<b>A. Successful completion of 3 Underground Injection Control ( UIC) Class I Deep Injection Wells, with a minimum casing diameter of 24-inches to a depth of at least 2,500 feet in Florida, within the past ten (10) years.</b>	
<i>The Vendor shall list three(3) references/projects demonstrating experience, ability and expertise in managing projects of similar size:</i>	
A.1.	For each project, provide UIC Permit Number, Owner’s Name and Contact Information, including email.
A.2.	In total, for all of the projects referenced here, has the respondent conducted 10 or more packer pumping tests at depths of 1,500 feet or greater to demonstrate confinement?
A.3.	For each project, has the respondent collected the requested samples or data to support all of the following : FDEP casing seat requests, monitoring zone requests, short-term injection testing requests and requests to commence operational testing?
A.4.	Experience & expertise in providing log-derived TDS plots. For each project, has the respondents provided log-derived TDS plots to support identification of the base of underground courses of drinking water?

<b>Project #1</b>
<b>Please provide the following information according to requirement A.1. above</b>
UIC Permit Number _____ Owner’s Name _____
Date Completed _____ Contact Name _____
Contact Phone No. _____ Contact Email _____
Project Description _____
_____
_____
<b>For this project, please provide the following responses to requirements A.2 , A.3., and A.4 above:</b>
Response for A.3., above: (Yes/No) _____
Response for A.4, above: (Yes/No) _____

<b>Project #2</b>
<b>Please provide the following information according to requirement A.1. above</b>
UIC Permit Number _____ Owner’s Name _____
Date Completed _____ Contact Name _____
Contact Phone No. _____ Contact Email _____
Project Description _____
_____

Solicitation Submittal Form**

111 NW1<sup>st</sup> Street, Suite 1300, Miami, FL 33128

Solicitation No. RTQ-00566		Solicitation Title: Injection Wells Prequalification Pool	
Legal Company Name (include d/b/a if applicable): <input type="text"/>		Federal Tax Identification Number: <input type="text"/>	
If Corporation - Date Incorporated/Organized: <input type="text"/>		State Incorporated/Organized: <input type="text"/>	
Company Operating Address: <input type="text"/>		City <input type="text"/>	State <input type="text"/>
Remittance Address (if different from ordering address): <input type="text"/>		City <input type="text"/>	State <input type="text"/>
Company Contact Person: <input type="text"/>		Email Address: <input type="text"/>	
Phone Number (include area code): <input type="text"/>	Fax Number (include area code): <input type="text"/>	Company's Internet Web Address: <input type="text"/>	

Pursuant to Miami-Dade County Ordinance 94-34, any individual, corporation, partnership, joint venture or other legal entity having an officer, director, or executive who has been convicted of a felony during the past ten (10) years shall disclose this information prior to entering into a contract with or receiving funding from the County.

Place a check mark here only if the Bidder has such conviction to disclose to comply with this requirement.

**LOCAL PREFERENCE CERTIFICATION:** For the purpose of this certification, a "local business" is a business located within the limits of Miami-Dade County (or Broward County in accordance with the Interlocal Agreement between the two counties) that has a valid Local Business Tax Receipt, issued by Miami-Dade County; has a physical business address located within the limits of Miami-Dade County from which business is performed; and contributes to the economic development of the community in a verifiable and measurable way. This may include, but not be limited to, the retention and expansion of employment opportunities and the support and increase to the County's tax base.

Place a check mark here only if affirming the Bidder meets the requirements for Local Preference. **Failure to complete this certification at this time (by checking the box above) may render the vendor ineligible for Local Preference.**

**LOCALLY-HEADQUARTERED BUSINESS CERTIFICATION:** For the purpose of this certification, a "locally-headquartered business" is a Local Business whose "principal place of business" is in Miami-Dade County or Broward County in accordance with the Interlocal Agreement between the two counties.

Place a check mark here only if affirming the Bidder meets requirements for the Locally-Headquartered Preference (LHP). **Failure to complete this certification at this time (by checking the box) may render the vendor ineligible for the LHP.**

The address of the Locally-headquartered office is:

**LOCAL CERTIFIED VETERAN BUSINESS ENTERPRISE CERTIFICATION:** A Local Certified Veteran Business Enterprise is a firm that is (a) a local business pursuant to Section 2-8.5 of the Code of Miami-Dade County and (b) prior to bid submission is certified by the State of Florida Department of Management Services as a veteran business enterprise pursuant to Section 295.187 of the Florida Statutes.

Place a check mark here only if affirming the Bidder is a Local Certified Veteran Business Enterprise. **A copy of the certification must be submitted with the bid.**

**SMALL BUSINESS ENTERPRISE CONTRACT MEASURES (If Applicable)**

A Small Business Enterprise (SBE) must be certified by Small Business Development for the type of goods and/or services the Bidder provides in accordance with the applicable Commodity Code(s) for this Solicitation. For certification information contact Small Business Development at (305) 375-3111 or access <http://www.miamidade.gov/smallbusiness/certification-programs.asp>. The SBE must be certified by the solicitation's submission deadline, at contract award, and for the duration of the contract to remain eligible for the preference. Firms that graduate from the SBE program during the contract may remain on the contract.

Is your firm a Miami-Dade County Certified Small Business Enterprise? Yes  No

If yes, please provide your Certification Number:

**SCRUTINIZED COMPANIES WITH ACTIVITIES IN SUDAN LIST OR THE SCRUTINIZED COMPANIES WITH ACTIVITIES IN THE IRAN PETROLEUM ENERGY SECTOR LIST:**

By executing this bid through a duly authorized representative, the Bidder certifies that the Bidder is not on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, as those terms are used and defined in sections 287.135 and 215.473 of the Florida Statutes. In the event that the Bidder is unable to provide such certification but still seeks to be considered for award of this solicitation, the Bidder shall execute the bid response package through a duly authorized representative and shall also initial this space: . In such event, the Bidder shall furnish together with its bid response a duly executed written explanation of the facts supporting any exception to the requirement for certification that it claims under Section 287.135 of the Florida Statutes. The Bidder agrees to cooperate fully with the County in any investigation undertaken by the County to determine whether the claimed exception would be applicable. The County shall have the right to terminate any contract resulting from this solicitation for default if the Bidder is found to have submitted a false certification or to have been placed on the Scrutinized Companies for Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List.

**IT IS HEREBY CERTIFIED AND AFFIRMED THAT THE BIDDER SHALL ACCEPT ANY AWARDS MADE AS A RESULT OF THIS SOLICITATION. BIDDER FURTHER AGREES THAT PRICES QUOTED WILL REMAIN FIXED FOR A PERIOD OF ONE HUNDRED AND EIGHTY (180) DAYS FROM DATE SOLICITATION IS DUE.**

**WAIVER OF CONFIDENTIALITY AND TRADE SECRET TREATMENT OF BID**

The Bidder acknowledges and agrees that the submittal of the Bid is governed by Florida's Government in the Sunshine Laws and Public Records Laws as set forth in Florida Statutes Section 286.011 and Florida Statutes Chapter 119. As such, all material submitted as part of, or in support of, the bid will be available for public inspection after opening of bids and may be considered by the County or a selection committee in public.

**By submitting a bid pursuant to this solicitation, you agree that all such materials may be considered to be public records. The Bidder shall not submit any information in response to this Solicitation which the Bidder considers to be a trade secret, proprietary or confidential.**

In the event that the Bid contains a claim that all or a portion of the Bid submitted contains confidential, proprietary or trade secret information, the Bidder, by signing below, knowingly and expressly waives all claims made that the Bid, or any part thereof no matter how indicated, is confidential, proprietary or a trade secret and authorizes the County to release such information to the public for any reason.

**Acknowledgment of Waiver:**

<b>Bidder's Authorized Representative's Signature:</b> <input type="text"/>	<b>Date</b> <input type="text"/>

**SUBCONTRACTOR/SUPPLIER LISTING**  
(Miami-Dade County Code Sections 2-8.1, 2-8.8 and 10-34)

Name of Bidder/Proposer: \_\_\_\_\_ FEIN No. \_\_\_\_\_

In accordance with Sections 2-8.1, 2-8.8 and 10-34 of the Miami-Dade County Code, this form must be submitted as a condition of award by all Bidders/Proposers on County contracts for purchase of supplies, materials or services, including professional services which involve expenditures of \$100,000 or more, and all Proposers on County or Public Health Trust construction contracts which involve expenditures of \$100,000 or more. The Bidder/Proposer who is awarded this contract shall not change or substitute first tier subcontractors or direct suppliers or the portions of the contract work to be performed or materials to be supplied from those identified, except upon written approval of the County. The Bidder/Proposer should enter the word "NONE" under the appropriate heading of this form if no subcontractors or suppliers will be used on the contract and sign the form below.

In accordance with Ordinance No. 11-90, an entity contracting with the County shall report the race, gender and ethnic origin of the owners and employees of all first tier subcontractors/suppliers. In the event that the recommended Bidder/Proposer demonstrates to the County prior to award that the race, gender, and ethnic information is not reasonably available at that time, the Bidder/Proposer shall be obligated to exercise diligent efforts to obtain that information and provide the same to the County not later than ten (10) days after it becomes available and, in any event, prior to final payment under the contract.

**(Please duplicate this form if additional space is needed.)**

Business Name and Address of First Tier Direct Supplier	Principal Owner	Supplies/Materials/Services to be Provided by Supplier	Principal Owner (Enter the number of male and female owners by race/ethnicity)								Employee(s) (Enter the number of male and female employees and the number of employees by race/ethnicity)

## Miami-Dade County

### Contractor Due Diligence Affidavit

Per Miami-Dade County Board of County Commissioners (Board) Resolution No. R-63-14, County Vendors and Contractors shall disclose the following as a condition of award for any contract that exceeds one million dollars (\$1,000,000) or that otherwise must be presented to the Board for approval:

- (1) Provide a list of all lawsuits in the five (5) years prior to bid or proposal submittal that have been filed against the firm, its directors, partners, principals and/or board members based on a breach of contract by the firm; include the case name, number and disposition;
- (2) Provide a list of any instances in the five (5) years prior to bid or proposal submittal where the firm has defaulted; include a brief description of the circumstances;
- (3) Provide a list of any instances in the five (5) years prior to bid or proposal submittal where the firm has been debarred or received a formal notice of non-compliance or non-performance, such as a notice to cure or a suspension from participating or bidding for contracts, whether related to Miami-Dade County or not.

All of the above information shall be attached to the executed affidavit and submitted to the Procurement Contracting Officer (PCO)/ AE Selection Coordinator overseeing this solicitation. The Vendor/Contractor attests to providing all of the above information, if applicable, to the PCO.

## Question and Answers for Solicitation #RTQ-00566 - Injection Wells Prequalification Pool

### Overall Solicitation Questions

#### Question 1

- How much will be the construction estimate?
- Have you issued any addenda for this project?
- I would like to ask a copy of the bidders list?
- Who is the Engineer or Architect that's working with this?
- May I have the complete address of the construction site? (Submitted: Jul 21, 2017 9:10:35 AM EDT)

#### Answer

- See Addendum No.1 (Answered: Jul 26, 2017 2:42:57 PM EDT)

#### Question 2

Youngquist Brothers, Inc. (YBI) has the following questions and/or requests for clarification regarding the above described Solicitation. Your review and response would be appreciated.

1. Please describe the anticipated sequence and estimated timetable for contracting and performance of the work in it's various elements.
2. Please provide a link to access the current Injection Well Plan mentioned in Section 3.1.
3. BID SUBMITTAL REF A.2

This requests confirmation of performance of 10 or more packer pumping tests, deeper than 1500 feet to demonstrate confinement. For each project used as a reference. While all Injection Well Projects require packer testing and several packer tests are generally performed to support the demonstration of confinement, no project to my knowledge has required 10 for that purpose. A typical Injection Well project may require from 4 to 10 packer tests, some for water quality definition and some for supporting the demonstration of confinement. ( YBI has performed over 1,000 such packer tests for both purposes )

We might suggest a more appropriate question would be has the respondent performed multiple packer tests for the purposes of defining water quality and supporting the determination of confinement on the projects listed.

4. SUBCONTRACTOR / SUPPLIER LISTING:

This form is included in the Solicitation documents. As this Solicitation is to determine qualifications, no suppliers or subcontractors are selected at this time. Please confirm if this form is to be submitted with this Request for Qualification? (Submitted: Jul 28, 2017 11:36:38 AM EDT)

#### Answer

- See Addendum No.2 (Answered: Aug 2, 2017 4:47:09 PM EDT)
